**JUSTIFICATION:**

An aerial survey conducted this year resulted in a minimum count of 162 goats within the RG248 mountain goat hunt area. The department set the maximum allowable state harvest at five goat units. Each billy counts as one goat unit, each nanny counts as two goat units, and each unrecoverable goat counts as one and one-half (1.5) goat units. Two billies and one nanny have been taken for a total of four goat units. Many hunters are currently in the field and it is likely that additional goats have been harvested and not yet reported. This closure is necessary to prevent unsustainable harvest.
